

## **Compliance action taken for childcare provision**

EY338756/C281660

**Date:** 27/04/2016

### **Summary of outcome**

On 12th April 2016 we received information from the provider that raised concerns about the provider's ability to safeguard children. The provider notified us that the wrong medication had been administered to a child. The notification means that the provider met their legal responsibility as set out in the Early Years Foundation Stage welfare requirements to notify Ofsted of significant events. We carried out an unannounced inspection where we looked at the concerns to see whether the provider was meeting the Early Years Foundation Stage requirements relating to medication. Following the incident the provider completed a full review and investigation of the incident. The review identified that medication needed to be checked by a senior member of staff and clearly logged into the building and on to medication forms. The inspection found that actions had been identified and implemented with regard to access to the administration of medication. During the inspection we found that staff had been thoroughly inducted on the reviewed medication policy and trained in the administration of medication. The provider remains registered with Ofsted.

### **Publication of compliance action**

We aim to ensure that the welfare of children and young people is protected in the services we regulate. The Childcare Act 2006 and accompanying regulations set out our responsibilities to regulate childminders and childcare providers. This includes the enforcement powers we have in relation to those registered providers who do not comply with the requirements for registration.

We publish details of any actions we take, or the childminder or childcare provider takes to bring about compliance with requirements on our website for a period of five years commencing on the date we complete our investigation.

For further information please read [Ofsted's Enforcement Policy](#).
